

Download Setup Files Safely from IESWeb.com

Integrated Engineering Software, Inc.
800-707-0816, support@iesweb.com

August 2023

Introduction

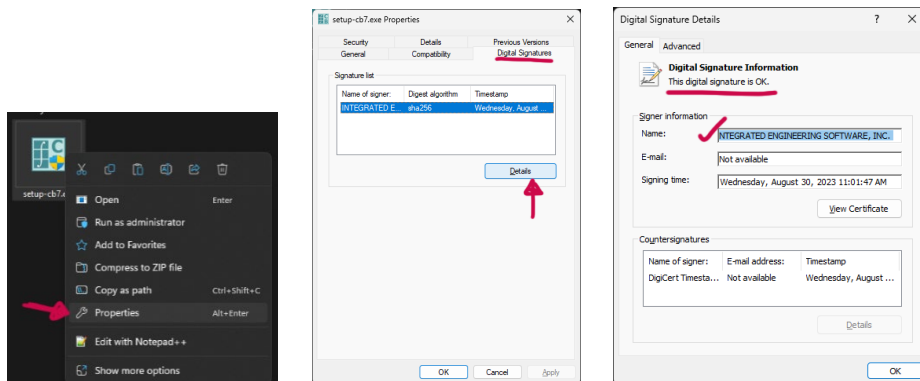

Sometimes Microsoft or Google will flag IES setup files (setup-xx.exe) with security warnings or even block them. The warning can happen in the web browser, or when you try to install the product.

IES uses industry standard digital signatures to prove files come directly from IES without tampering. Microsoft is working to keep you safe, but sometimes the systems fail us, warning when it is unnecessary. For more information about downloading and setups, see: www.iesweb.com/faq.

Verifying IES Digital Signatures

Before running a setup-xx.exe file from IES, you may quickly and easily verify that the file was digitally signed by Integrated Engineering Software, Inc. using these steps:

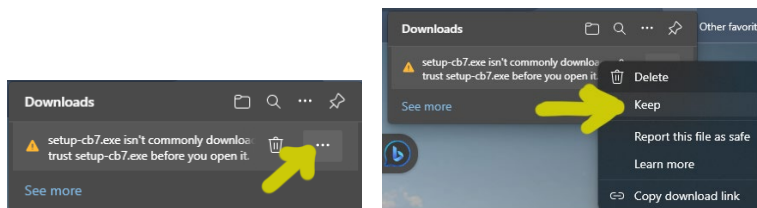

1. **Right-click** on the setup file in Windows File Explorer.
2. Choose **Properties**.
3. On the **Digital Signature** Tab, click on the **Details** button...
4. Verify the certificate shows as **OK**.

Bypass Microsoft Edge Blocking

If Microsoft Edge prevents downloading the file from iesweb.com, you can override the block and choose to keep the file, then verify the signature.

1. Hover over the message to click the "..." button.
2. Choose **Keep** from the popup menu.

Getting Past Windows Defender's Smart Screen

When trying to run the setup-xx.exe file, you may get a warning from Windows Defender. You may verify the signature and still install the product.

1. Click the **More Info** link.
2. Verify IES as the publisher and choose **Run Anyway**.
